

M.Sc. in Climate Change and Development, an International Master's Programme

Since May 2013 the School of Environmental Science and Management at Independent University, Bangladesh (IUB), along with the International Centre for Climate Change and Development (ICCCAD), has been running a one-year Master's Programme in Climate Change and Development (CCD). This full-time international degree aims to capacitate students to address climate change and development issues effectively worldwide. Faculty members from home and abroad offer classes, with state of the art curriculum, which combines with practical, hands-on research and field visits in a country at the forefront of climate change. So the programme will prepare students for future career opportunities around the globe in government, non-profit sector, private sector, academia, etc.

Graduates of this Master's programme will play a critical role in shaping and contributing to the urgently-needed capacity building for addressing climate change and development efforts. It will offer a unique international perspective and insight on adaptation to all major climate change impacts faced by Bangladesh, which will prepare graduates to handle similar problems anywhere. Learning lessons from Bangladesh now increasingly regarded as a global leader on adaptation and resilience is indeed a unique opportunity for graduate education.

IUB

**Independent University,
Bangladesh**

Enroll today

Admission Procedure: Call for application gets published in the dailies and websites (www.icccad.org and www.iub.edu.bd) in March/April and class commences in May every year.

Application Deadline: May 16th, 2021

Registration: May 23, 2021

Semester begins: May 30, 2021

Application link:
