Dr Lisa Schipper

Dr Lisa Schipper is an
Environmental Social
Science Research Fellow
at the Environmental
Change Institute at the
University of Oxford.

Dr. Schipper's work focuses on adaptation to climate change in developing countries, and looks at gender, religion and culture to understand what drives vulnerability. By examining how development affects the extent to which people are likely to be affected by climate change, she seeks to address the question of whether fair and just development is possible in a changing climate. Lisa is currently Co-ordinating Lead Author of Chapter 18 of the Working Group 2 contribution to the Sixth Assessment Report of the Intergovernmental Panel on Climate Change (IPCC) ('Climate Resilient Development Pathways'). She is co-Editor-in-Chief of the journal *Climate and Development* (Taylor and Francis), Associate Editor of *Mitigation and Adaptation Strategies to Global Change* (Springer) and member of the editorial board of the journals *World Development Perspectives* (Elsevier) and *Global Transitions: Health Transitions* (KeAi).

Dr. Schipper holds a PhD in Development Studies and an MSc in Environment and Development from the University of East Anglia, and a BSc in Environmental Science from Brown University. A Swedish and US dual national, she has lived and worked in Central and South America, East and West Africa and South and Southeast Asia.

Designated Discussants:

Aditya Bahadur, Principal researcher, Human Settlements, International Institute for Environment and Development (IIED)

Prof. Mizan R Khan, Deputy Director and LUCCC Programme Coordinator, International Centre for Climate Change and Development (ICCCAD)

Moderator:

Prof. Saleemul Huq, Director, International Centre for Climate Change and Development (ICCCAD)

The ICCCAD and IUB E - lecture series is a series of monthly, online lectures with renowned experts working in the field of climate change and development. The lectures provide an opportunity to share knowledge and have discussions on important topics and issues relevant to the climate change discourse.
